WL-UMD325

OVERVIEW

1. RJ-45 port
2. SD/Micro SD Slot
3. USB-A (5Gbps)
4. USB-C (5Gbps)
5. USB-C Connector (Host, PD85W)
6. Audio/Mic

7. USB-C (PD IN 100W)
8. HDMI (4K@60Hz)

IN THE BOX

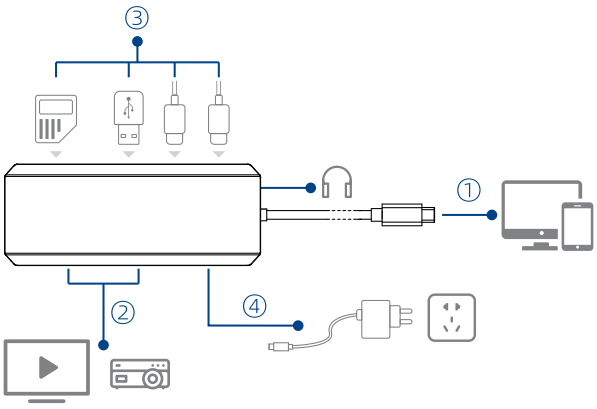

- 1×USB-C Dual Display MST Docking Station
- 1×Quick Start Guide

SYSTEM REQUIREMENT

- Microsoft Windows 7 / 8 / 10 / 11
- Mac OS 10.8 or later (Can extend a different display ONLY)

HOW TO USE

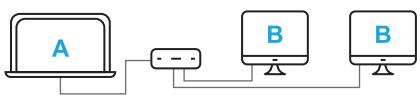

①: Connect the USB-C Connector of the docking station to your laptop or phone.
②: This docking station supports dual display. Connect HDMI ports to the TV, projector, or other HDMI-based monitors.
③: Connect USB-C/A to USB peripherals, and use the SD/Micro SD slot, RJ-45 Ethernet port, or audio/mic port according to your needs.
④: If you want to charge your laptop or phone, please connect the USB-C Port (PD IN 100W) to the power source.

DISPLAY RESOLUTION

Systems / Scenarios	Windows	macOS
Single Display	4K@60Hz(DP1.4) 4K@30Hz(DP1.2)	4K@60Hz(DP1.4) 4K@30Hz(DP1.2)
Dual Display	Dual 4K@60Hz (DP1.4 & DSC) Dual 2560x1440 @60Hz(DP1.4) Dual 1080P @60Hz(DP1.2)	4K@60Hz(DP1.4) 4K@30Hz(DP1.2) (Mirror)

*Note:
1. When connected to an Apple computer, our product can extend to 1 external monitor.
2. Mac OS supports single-stream transport, so only one video source can be output, such as ABB (A is the primary display).

Scan the QR code or visit the link to obtain the detailed instruction manual for complete Display Setting steps.

FAQ

Q1. How to figure out the maximum resolution(DP1.2/DP1.4) my laptop supports via type-c port?
A1. Please contact laptop manufacturer to confirm that.
Q2. Why does it show “slow charging” on my laptop?
A2. Some users may notice that the charging status shows “slow charging”, this is because some series of laptop have a protection protocol, especially laptops that have both Thunderbolt 3 port and over 100W external DC power adapter. Please solve it by using an external power adapter to charge.
Q3. Why does this Docking power off and reconnect after the PD power supply is unplugged?
A3. When this Docking switches the power supply from the original PD to the computer power supply, there will be a long delay on the computer that does not support fast switching, resulting in power outage and reconnection on this Docking due to insufficient power supply.
Q4. My Laptop/PC supports PD and DP ALT MODE, but why is it still not working properly?
A4. Please try to update the PC/Laptop’s BIOS, Graphics Card, and other Drivers to the latest version, or contact our Customer Service.

Thank you for purchasing WAVLINK product!
