FAQ

Q1. Can the Dock's USB ports connect USB flash disk or mobile HDD?

- Yes, Steam Deck only supports the use of USB external mobile hard disk, U disk and other storage devices in the desktop mode, and game mode only supports the TF card.

Q2. Why does the product heat up at work?

- Electronic product usually produces heat at work. Multiple internal functional modules are stored in this product, which results in a high heat temperature. What’ s more, the housing of the product is metal with a higher sensible temperature. This is a normal phenomenon.

Q3. My display can support 3840X2160@144Hz, why can't I reach it after connecting it?

- Generally, the display can’t reach resolution of 3840X2160@144Hz at the first connection. Please enter the desktop mode, set resolution and refresh rate, then the display can reach 3840X2160@144Hz.

Q4. Does this Steam Deck dock support charging while playing?

- Yes. This Steam Deck supports charging and playing at the same time.

Q5. Is it possible to directly connect my Steam Deck with the protection case to this dock?

- This dock is compatible with mostly Steam Deck’s protection cases on the market(Regular thickness in 2.5mm) . You can directly connect dock without removing case.
