HOW TO USE

Note: Ensure the driver has been installed before using this Docking Station. Detailed driver installation in Driver Installation of this user guide.

Step 1: Connect the Host

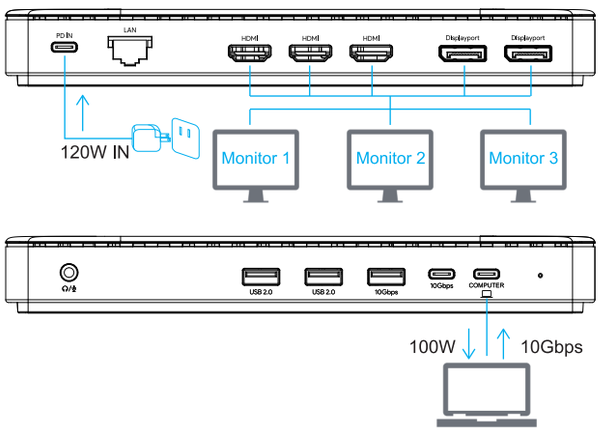

Connect one end of the USB-C cable to the USB-C Upstream port of the docking station, then connect the other end to the USB-C on the computer. (If it is a USB-A port, then use the USB-C to USB-A Adapter to connect.)

Step 2: Connect the Monitors

This docking station supports up to 3 displays, please select any one/ two/three of them to extend or mirror the screen.

Step 3: Connect the Power

Connect one end of a power adapter to the PD IN, then plug the other end of it into the power outlet.

DRIVER INSTALLATION

The docking station is based on Silicon Motion technology, which manages the graphics function. It requires downloading and installing the Silicon Motion driver to make it work, found here:

www.wavlink.com/en_us/WL-UG77PD1-PRO or www.siliconmotion.com/downloads/SM770-drivers.html.

Scan the QR code or visit the link to obtain the detailed instruction manual for complete driver installation steps.

DISPLAY RESOLUTION

Items		Extend	Mirror
Single Display	Windows	3840x2160@60Hz	
	Mac		
Dual Display	Windows	3840x2160@60Hz	
	Mac		
Triple Display	Windows	3840x2160@60Hz	
	Mac		

FAQ

Q1. Why does the App want to record my screen when I install the App for my Macbook?

A1. Mac OS requires users to permit “Screen Recording” for the Silicon Motion driver to work properly. But the Silicon Motion will not send any information to the Wavlink and the Silicon Motion. Please do not worry about that.

Q2. Why can't the Apple TV, Hulu, and Netflix play when the docking station is connected?

A2. The docking could not support HDCP, so protected content such as Apple TV, Hulu, and Netflix can't play when the docking station is connected. Please disconnect it when you are playing these videos. Or you could also try to use the Chrome browser to watch these videos and disable the Hardware Acceleration.
